

# ABSTRACT OF THE DISCLOSURE

A lens-fitted photo film unit contains a battery unit. The battery unit has a battery, which includes positive and negative battery electrodes. A battery case is formed from  
5 insulating material, and contains the battery. An elastic cap is included in the battery case. First and second contact segments are thrust through respectively the elastic cap in a watertight manner, and contact respectively the positive and negative battery electrodes, for external  
10 connection of the battery.
